## Handheld Computer

Subject: AML Product Launch Document

Product Bulletin: PB-M7225-A01252010

Date: January 27, 2010

Affordable  
 Versatile  
 Durable  
**Sensible**

### Introducing the M7225 Handheld Computer

The M7225 is the perfect combination of durability and usability. It is rugged enough to handle industrial environments such as warehousing and manufacturing, but lightweight and compact enough for retail or commercial applications. Use it in the store, in the backroom, in the warehouse, or on the plant floor. Designed with the user in mind, it's comfortable, easy to operate, and versatile. The full alphanumeric keypad means minimal "cell phone pecking" which means fewer mistakes and better efficiency. The barcode scanner alerts the user of "good reads" or "no reads" with its unique OnScreen Verification System. Whatever the application, the M7225 is the sensible solution.

*Join AML for a brief product overview of the newly released AML M7225 Handheld Computer.*

### Features & Benefits

Full alphanumeric keypad	No limit to usability with a 55-key keypad with full alphanumeric content. Little or no "multi-stroke" entry required. Keeps keying errors to a minimum.
15.8 watt hour Li-Ion battery	Enables all-day operation without a battery swap or re-charge.
Weighs just 17.6 oz (500 grams) w/o handle	Light weight minimizes fatigue resulting from all day use in scan-intensive applications.
Windows® CE 6.0	Latest embedded operating system from Microsoft®. Use standard Windows® embedded software tools including Microsoft® Embedded Visual C++ and Visual Studio to develop custom applications.

128MB RAM, 128MB ROM (microSD card for expansion)	More than enough memory for virtually any application.
Full Audio Capability	Integrated amplified speaker headphone jack. Dedicated high-power beeper for barcode scanner.
Numerous configurations available	Configure the M7225 to fit the application requirements. Choose between 1D and 2D barcode scan engines, wireless or batch operation. Also available with and without a pistol-grip handle.

**Barcode Scanning**

With the M7225, choose between standard range laser, long range laser, or a 2D imager. If you're not sure which scan engine is right for your application, consult your AML sales representative.

**Scanner Feedback**

Users can select a variety of ways in which the M7225 can alert if a barcode scan was good, or if it was a miss-read. A "good read" can be indicated by an audible beeper as well as a quick flash of green on the display. A "no read" can be indicated by quick flash of red on the display, or by a brief vibrating sensation.

**Wireless Communications**

The M7225 offers a choice between two wireless configurations. One is a combination 802.11b/g+Bluetooth radio, which offers both WLAN and WPAN communications while optimizing power management.

The second radio option is a high-power Summit® 802.11a/b/g radio for true enterprise applications utilizing WEP, WPA, WPA2, or 802.1x security, including Cisco Compatible Extensions (Version 4).

**User Comfort**

Choose between a "brick" or "flashlight" version, with comfortable hand-strap, or a pistol-grip version with the scan trigger on the handle.

**Backwards Compatible**

The M7225 can be charged with older generation AML charging accessories, like the ACC-7025 and ACC-5925. AML users of M7100, M71V2 and M7220 data collection terminals, can upgrade to the M7225 and still use their old charging accessories.

### **Wired Communications**

The optional ACC-7225 cradle provides both Ethernet and USB wired connectivity. Both Master and Slave USB ports are available.

## Part Numbers & Pricing [View PDF - List or Partner](#)

*All prices are US dollars.*

AML Part No.	Description	LIST Price
M7225-0000-00	M7225, Batch, No Scanner, 55-key, Win CE 6.0 Pro	\$1,195
M7225-0000-10	M7225, Batch, No Scanner, 55-key, Handle, Win CE 6.0 Pro	\$1,275
M7225-0100-00	M7225, Batch, Laser, 55-key, Win CE 6.0 Pro	\$1,395
M7225-0100-10	M7225, Batch, Laser, 55-key, Handle, Win CE 6.0 Pro	\$1,475
