

Product: M8050 Compact Handheld Computer
Subject: TracerPlus Application Development Software
Published: August 10, 2009

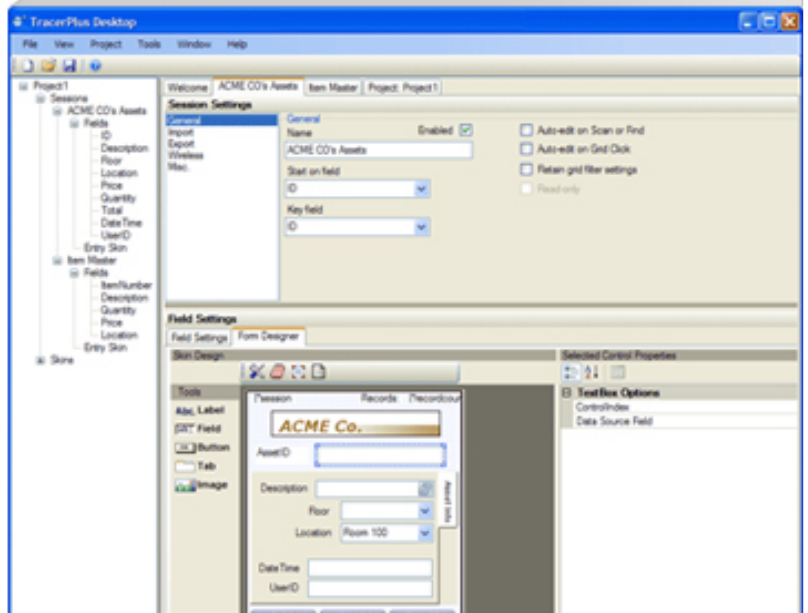

TracerPlus™, by Portable Technology Solutions, now supports the AML M8050 Compact Handheld Computer.

Write and deploy data collection applications easily and quickly, with no programming experience required! TracerPlus™ Desktop gives non-programmers the power to create enterprise class mobile forms in an intuitive drag and drop environment similar to most publishing programs. TracerPlus™ Desktop comes free of charge, but a TracerPlus™ mobile client is required for each M8050 onto which the application is to be deployed.

Designed with today's cost-conscious retailer in mind, the new AML KDT900 is a user-friendly, full-feature kiosk system that delivers outstanding functional value in a compact, space-saving footprint. Featuring simple touch screen navigation and a 5.6" full VGA color display, the KDT900 allows retailers to display colorful graphics and messages that will engage customers and enhance the shopping experience - right at the point of purchase.

AML M8050 Compact Handheld Computer

The combination of TracerPlus™ Desktop and TracerPlus™ Professional quickly creates batch data collection applications. Use TracerPlus ODBC™ to directly connect to any ODBC-compliant database and TracerPlus Connect™ to populate an Excel® spreadsheet.

Pricing (List) & Part Numbers

TracerPlus™ Software

Create Mobile, Barcode Enabled, Data Collection Forms for the M8050 or KDT900. No programming knowledge is needed to use TracerPlus. Fixed asset management, mobile inventory, mobile sales, equipment maintenance, and inspection forms are simple to create, deploy and manage with TracerPlus mobile software.
