

## Data Collection Solutions

### M7225 HANDHELD COMPUTER

The AML M7225 handheld computer delivers robust versatility at an affordable price. Use it for virtually any barcode data collection application in any environment. Equipped with Windows® CE, 802.11g radio, and integrated barcode scanner, there's no better value on the market today.

### M7220 WIRELESS TERMINAL

The M7220 provides wireless connectivity for streamlined performance. With native clients for VT100/220, TN3270, and TN5250, it is the best choice for barcode data collection applications utilizing terminal emulation.

### M8050 COMPACT HANDHELD COMPUTER

The M8050 is the most versatile tool available for retail and hospitality applications. With both an integrated barcode scanner and magnetic stripe reader, it gives the user true mobility, while the ultra-long-life battery means all day performance.

### M5900 BATCH DATA TERMINAL

For batch applications, the M5900 delivers big-business performance at a small business price. Its large display and full alphanumeric keypad deliver maximum usability. Easy-to-use application development software is included.

### KDT900 miniKIOSK

The KDT900 is an affordable multi-purpose mini-kiosk running Windows® CE. It's the perfect hi-tech tool for price checking, time & attendance, access control, and many other applications.

### KDT750 PRICE VERIFICATION SYSTEM

AML's KDT750 is a completely self-contained price checking system. It comes complete with a price checking application already installed, and sample code for the server-side lookup functionality. Its full VGA display delivers stunning images, so it can double as a digital sign.

## MT7570 VEHICLE MOUNT COMPUTER

With a rugged IP65 sealed metal construction, the AML MT7570 vehicle mount computer delivers robust computing capabilities for harsh industrial data capture applications. The MT7570 features an integrated 802.11b/g WLAN radio, 12.1" color touch screen display, and an internal DC power converter. The MT7570 is available with either open-source embedded Linux® or Windows® XPe. Both operating systems include terminal emulation clients (VT100/220, TN5250, TN3270), web browser(s) and VoIP (Skype®) client. Options include external keyboard and internal UPS battery.

## M7170 VEHICLE MOUNT TERMINAL

The AML M7170 vehicle mount terminal supports real-time data collection in the factory, on the loading dock and in the warehouse yard. The M7170 mounts directly to industrial vehicles such as forklift trucks and enables real-time data transfer between mobile operators and back-end host applications. Built to last with heavy-duty steel construction and an IP54 environmental rating, the M7170 is ideal for real-time receiving, put-away, picking and shipping applications in rugged industrial environments. Optional heater for cold storage applications.

## M7140 STATIONARY TERMINAL

The AML M7140 is ideal for fixed station, wired or wireless data collection and system control applications. The M7140 offers an extensive range of connectivity and input/output interfaces including RS-232 ports for bar code scanners and other serial devices, optically isolated inputs and relay contact outputs for integration with PLCs, conveyors, scales and alarm devices. The M7140 provides performance flexibility for labor tracking, work-in-process tracking, shop floor data collection and industrial process control. Optional magnetic stripe reader or slot reader attachment.

## ABOUT AML Sensible Solutions

AML is a trusted developer and manufacturer of reliable, high performance automated data collection products. Since 1983, AML and its business partners have helped companies worldwide to optimize efficiencies, enhance productivity and improve supply chain performance - in manufacturing, logistics, distribution, retail and healthcare applications.

AML products include, handheld data capture computers, programmable stationary terminals (fixed station, wired and wireless), vehicle mounts (computer or terminal) and stationary mini-kiosks. AML data capture products deliver proven technology that is easy to implement, cost-effective and backed by the direct involvement of real people, before and after the sale.
